Project Title: Yayoi Kusama Website

- Typography/Typeface: Play around more w/ the font. The type doesn't match the playfulness of Kusama
- The colors of the circles could be more vibrant, they seem a little too pastel right now
- Landing Page: Get rid of side nav bar (only on landing page) and image of Kusama because it feels busy. Nav bar should show after landing page section.
- I like the sad nav bar, but consider making the navigation bar taller and the line heights between the different headings bigger
- I like how the background color changes as you change sections
- I'd like to see a gallery section that showcases her work
- Make the background is sticky (as in it doesn't move) when the user scrolls
